

ANTI-DEPREDATION PINGER

3 kHz – 12 kHz

- ✓ **STOP WHALES, SEALS AND DOLPHINS TAKING YOUR CAUGHT FISH**
- ✓ **REDUCE DAMAGE TO YOUR GEAR**
- ✓ **FISH SUSTAINABLY BY REDUCING BYCATCH**

OPERATING SPECIFICATIONS

- Frequency: randomized 3 kHz – 12 kHz
- Sound pressure level: 150+ decibels.

BATTERY

- 1.5v Alkaline C cell.

BATTERY LIFE

- 10 days based on 12 hours of use per day.

DIMENSIONS

- 140 mm (5.5 inches) long x 50 mm (2 inches) wide.

WEIGHT

- 78 grams / 2.75 ounces
- 150 grams / 5 ounces (with battery).

OPERATION

- Hands-free water-activated capacitance switch
- Works in all water – salt or fresh.

EXTERNAL CASING

- Highly durable UV-resistant copolymer.

INTERNAL HOUSING

- Tough thermoplastic polymer.

PINGER SPACING

- Space Pingers every 100 meters on the net.

FEATURES

Hands-free operation. It turns on and off instantly as Pinger enters and leaves the water.

Smallest, lightest, safest Pinger on the market.

We offer the world's toughest, most reliable Pinger by combining an external copolymer carrier with super-tough internal thermoplastic polymer housing with optimised engineering.

Our internal electronic capsule is locked inside the external housing – the internal electronic capsule cannot fall out while Pinger is attached to the net, unlike competitors' products.

Our Pingers are easily and quickly attached to net ropes of all sizes. No need to thread ropes through our casing means faster, easier attaching and removing.

Easy to see battery level LED indicator with Red LED low battery warning.

Easy to replace batteries.

Pingers are supplied with batteries and an attachment cord – ready to fit too easily and quickly to your net.

Advanced optimised sound generation ensures a consistent output of 150+ decibels.

Pingers are tested to 1000 meters in depth.

12 months warranty.
